

Whitepaper: Wrapped USDT (Wormhole) - wUSDT

Token Overview

Token Name: Wrapped USDT (Wormhole)

Symbol: wUSDT

Blockchain: Solana

Token Type: SPL (Solana Program Library)

Decimals: 6

Total Supply: 10,000,000,000 wUSDT

Contract Address: 57GajvDHazpCCCCpKgiHppJJf5cjwHWancCZZLPoeFMj

Initial Mint Date: June 14, 2025, 17:15 UTC

Mint Authority: HJdkDS...vNa7Ud

Creator Address: HJdkDS...vNa7Ud

Website: <https://wrappedusdt.carrd.co/>

Project Purpose

Wrapped USDT (wUSDT) is a Solana-native wrapped representation of Tether (USDT), bridged via the Wormhole protocol.

Its purpose is to provide high-speed, low-fee USDT transfers and trading on the Solana network, while maintaining a 1:1 peg with the original ERC-20/USDT asset.

Security & Liquidity

- Liquidity Locked: 2 Billion wUSDT tokens are locked in Jupiter aggregator liquidity pools, ensuring fair market access and reducing volatility.
- Smart Contract Authority: The token is managed via a secure and pausable mint authority (HJdkDS...vNa7Ud), with future plans to renounce or transfer ownership to a governance DAO.
- Audit Status: Currently unaudited; future plans include third-party security reviews and Wormhole bridge audit references.

Utility

Whitepaper: Wrapped USDT (Wormhole) - wUSDT

wUSDT enables:

- Stablecoin-denominated DeFi trading on Solana
- Participation in lending protocols and decentralized derivatives
- Gasless payments in upcoming wUSDT-integrated applications
- On-chain game or gaming rewards settlements

Roadmap

Q2 2025 - Token deployed on Solana mainnet

Q2 2025 - 2B tokens locked on Jupiter pools

Q3 2025 - Listing on GeckoTerminal and Trust Wallet

Q3 2025 - Community airdrop and marketing campaign

Q4 2025 - DAO formation and mint authority transfer

Q4 2025 - Audit and token bridge integration upgrades

Social & Transparency

We are committed to building in public. Official updates, stats, and governance will be shared transparently via:

- Website: <https://wrappedusdt.carrd.co/>

Disclaimers

wUSDT is not issued by Tether Inc. It is a community-wrapped version bridged via Wormhole. This project is experimental and should be used with caution until full audits and DAO governance are in place.
